DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a vaccine comprising a vector encoding an attenuated sequence of VEE and a first method of use. If applicant elects this group, applicant is required to elect either SEQ ID NO: 2 or SEQ ID NO: 3 in claim 8 because each of the sequences are structurally distinct, as evidenced by a separately designated sequence identifier.

Group II, claim(s) 18, drawn to a multivalent vaccine.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of group I is drawn to a vaccine comprising a vector encoding an attenuated sequence of VEE and a first method of use. The product of group II does not share the special technical feature because it is a second product comprising additional ingredients that are outside of the defining special technical feature of group I. Therefore, the groupss lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
